

This is a simulation of meet, scheduled or not, between any two teams in a division, based on the most recent swims of the teams involved. Simulations will be updated when the teams involved have new meets.

This is based on the most recent swims in the events, not season-best times.

This simulation is not based on the coach's submissions of who will swim in particular events in this upcoming meet. It is likely that the swimmers in some events will not be the same as in this virtual meet.

You can click on any swimmer's name to see all recorded times by that swimmer provided by the league for additional insight on likely performance.
